**Microbiology Department**

**Minutes of the meeting**

Microbiology department meeting was conducted on 10/03/2023 at 11:00 AM under the chairpersonship of Dr.I.Vijaya babu to discuss the following agenda.

**Agenda:**

1. To conduct coaching classes for PG Entrance Examination (AP PG CET) for final year students. After a brief discussion in the meeting the following resolutions have been passed by the committee.

1. To seek permission from the Principal to conduct coaching classes for PG Entrance Examination on 15/03/2023 to 4/4/2023 from 4:00 PM.
2. To prepare a circular on PG coaching classes and circulate among the students of biological / life science of the final year.
3. The proposed coaching classes should conduct by Department of biological sciences and the nominated persons for taking classes are

A. Dr.Rekha, Department of Biotechnology

*Rekha*

B. Dr.S Padmavathi, Department of Botany

*S. Padmavathi*

C. Dr.K.Rama Rao, Department of Zoology

*K. Rama Rao*

D. Dr. CH. Lalitha Department of Microbiology

*Ch. Lalitha*

E. Dr. K. Prakash Narayana Reddy Department of Microbiology

*K. Prakash Narayana Reddy*

Request Letter

From  
Dr. CH. Lalitha  
Head of the Department  
Department of Microbiology  
Dr. V. S. Krishna Govt. Degree College (A),  
Visakhapatnam.

To  
Dr. I. Vijay Babu  
Principal,  
Dr. V. S. Krishna Govt. Degree College (A),  
Visakhapatnam.

Respected Sir,

The departmental meeting held on 11/03/2023 at 11:00 AM passed a resolution to organise coaching for PG Entrance Examination (AP PG CET) for final year biological stream students.

Hence, we request you to kindly grant the permission to organise the programme on 15/03/2023 to 4/4/2023 from 4:00 pm

Thanking you Sir,

Yours faithfully,

O/o The Principal,  
Dr. V. S. Krishna Government Degree College (A),  
Visakhapatnam.

Circular

This is to inform all the students & staff that the department of Microbiology is organising coaching for PG Entrance Examination (AP PG CET) for final year students on 15/03/2023 to 4/4/2023 from 4:00PM. So, all the students are informed to attend and make the event successful.

  
Principal  
Dr. V.S Krishna Govt. Degree College  
VISAKHAPATNAM

Date: 13/03/2023  
Station: Visakhapatnam.

**Dr. V. S. KRISHNA GOVT. DEGREE & P.G. COLLEGE (A)**

(NAAC Reaccredited "A" Grade Institution)

Visakhapatnam – 530013

<b>Name of Department/ Cell</b>	<b>MICROBIOLOGY</b>

<b>Date of Event Organized</b>	15/03/2023-4/4/2023
<b>Name of the coordinator of the Event</b>	Dr. CH. Lalitha
<b>No. of Participant (Student+ Staff)</b>	30+10 (40)
<b>Name of the Expert with designation Contact number &amp; Address of the Expert</b>	<ul style="list-style-type: none"><li>• Dr. Rekha Lecturer in Biotechnology 9652069674; Dr.V S K GDC(A), VSP</li><li>• Dr. Rama Rao Lecturer in Zoology 90107 05687; Dr.V S K GDC(A), VSP</li><li>• Dr. S Padmavathi Lecturer in Botany 8106543229; Dr.V S K GDC(A), VSP</li><li>• Dr.CH.Lalitha HOD of Microbiology 9491331865; Dr.V S K GDC(A), VSP</li><li>• Dr. K. Prakash Narayana Reddy Lecturer in Microbiology 9482357349; Dr.V S K GDC(A), VSP</li></ul>

### Objective of the Event

The main objective of the programme is to induce professionalism in high end areas of biotechnology for activating productive research in Molecular biology, recombinant DNA technology, genomics and proteomics at industrial scale.

Provide modern diagnostic system and product testing techniques for improved healthcare delivery and industrial production of goods & services. Facilitate collaboration and participation with relevant scientists from across the world.

Students will understand the structures and purposes of basic components of prokaryotic and eukaryotic cells, especially macromolecules, membranes, and organelles. Students will understand how these cellular components are used to generate and utilize energy in cells.

Animal Science is an applied biology aimed at solving man's nutritional deficiencies by making livestock and its products available in man's daily menu.

Fundamentals of Anatomy & Physiology gives students in-depth instruction in the organization, structures, and functions of the human body. Students will learn the terminology, anatomy and physiology, and pathology of each body system and how they interrelate to maintain homeostasis.

Genetics. Objectives. • *To understand how nucleic acids transport genetic information.* • To understand experiments that showed the role of nucleic acids for.

Formulate original questions about plants into empirically testable hypotheses, collect and analyze data obtained from original research, and translate and apply experimental data to advance the field and solve real-world problems. Synthesize and apply knowledge to better understand and manage plant-based systems.

The structural adaptations and functional adjustment of organisms to their physical environment. The behavior of organism under natural conditions (ethology). The

	<p>evolutionary development of all these inter-relations (evolutionary ecology).</p> <p>Immunology is a diverse and growing discipline that can be defined as the study of the tissues, cells and molecules involved in host defence mechanisms. Immunologists attempt to understand how the immune system develops, how the body defends itself against disease, and what happens when it all goes wrong.</p>
	<p>Microbiologists are involved in addressing challenges that vary from urgent problems demanding immediate solutions, such as new and emerging diseases, through to long-term issues, like antimicrobial drug resistance, food security and environmental sustainability.</p> <p>They are to promote health and reduce the risk of developing chronic diseases by encouraging Americans to consume healthful diets and to achieve and maintain healthy body weights. Nutrition criteria are reflective of a solid scientific foundation for health and weight management.</p> <p>Metabolism consists of a series of reactions that occur within cells of living organisms to sustain life. The process of metabolism involves many interconnected cellular pathways to ultimately provide cells with the energy required to carry out their function.</p> <p>Technique allows accomplishment of the objective in a variety of ways. Technique is flexible. Technique, purely physical, purely mental, and/or using tools, allows you to perform some task or other. You can know what to do, but not have the tools.</p> <p>Define the basic structure of biomolecules, such as: amino acids and proteins, carbohydrates, fatty acids, triacylglycerol, phospholipids, steroids and nucleic acids. 2: Define the meaning and significance of essential and non-essential amino acids. 3: Understand the function of enzymes.</p>
<b>Description of the event</b>	<p>Genetic engineering is a field of molecular biology that involves manipulating the structure of genetic material, i.e., deoxyribonucleic acid. Recombinant DNA</p>

(rDNA), is a strand of DNA that has been manipulated by scientists.

Biotechnology is technology that utilizes biological systems, living organisms or parts of this to develop or create different products. Brewing and baking bread are examples of processes that fall within the concept of biotechnology (use of yeast (= living organism) to produce the desired product).

Cell biology is the study of cell structure and function, and it revolves around the concept that the cell is the fundamental unit of life. Focusing on the cell permits a detailed understanding of the tissues and organisms that cells compose.

Animal science is the biological science and management of domestic livestock, including beef cattle, horses, sheep, swine and companion animals. Students learn the science, art and practical methods of caring for, improving and managing livestock and companion animals.

Physiology is the science of life. It is the branch of biology that aims to understand the mechanisms of living things, from the basis of cell function at the ionic and molecular level to the integrated behaviour of the whole body and the influence of the external environment.

Genetics is the scientific study of genes and heredity—of how certain qualities or traits are passed from parents to offspring as a result of changes in DNA sequence. A gene is a segment of DNA that contains instructions for building one or more molecules that help the body work.

Plant Sciences is the study of plant growth, reproduction, evolution, and adaptation, as well as the use of plants for food, fiber, and ornamental purposes.

The field of ecology explores the interactive web of organisms and the environment. Studies in evolution consider the processes by which modern organisms have developed from ancestral ones.

Immunology is the study of the immune system and is a very important branch of the medical and biological sciences. The immune system protects us from infection through various lines of defence. If the immune system is not functioning as it should, it can result in disease, such as autoimmunity, allergy and cancer.

Microbiology is the study of the biology of microscopic organisms - viruses, bacteria, algae, fungi, slime molds, and protozoa. The methods used to study and manipulate these minute and mostly unicellular organisms differ from those used in most other biological investigations.

Nutrition is about eating a healthy and balanced diet. Food and drink provide the energy and nutrients you need to be healthy.

Metabolism (pronounced: meh-TAB-uh-liz-um) is the chemical reactions in the body's cells that change food into energy. Our bodies need this energy to do everything from moving to thinking to growing. Specific proteins in the body control the chemical reactions of metabolism.

A biomolecule is a chemical compound found in living organisms. These include chemicals that are composed of mainly

### Outcome of the Event

carbon, hydrogen, oxygen, nitrogen, sulfur and phosphorus. Biomolecules are the building blocks of life and perform important functions in living organisms.

For example, genetic engineering may involve adding a gene from one species to an organism from a different species to produce a desired trait. Used in research and industry, genetic engineering has been applied to the production of cancer therapies, brewing yeasts, genetically modified plants and livestock, and more. Tap water is usually tested for chlorine levels, pH in water and bacteria. It is advisable to test well water supplies annually even if they are not suspected in any contaminations. There are some types of water issues that can't be detected without testing.

To provide education that leads to comprehensive understanding of the principles and practices of biotechnology. Information and Computer Literacy: To educate and make them up to date with the current scientific literature, computer programs and web information.

Describe the evolution, diversity and replication of cells; Explain the role of compartmentalization and signaling in cellular biology; Interpret and explain key experiments in the history of cell biology; Evaluate and apply knowledge of modern techniques in cellular biology.

Animal science—the study of the biological function of domestic and captive animals and their utilization by people—focuses on modern, efficient and humane ways to care for and make the best use of the animals who share our lives.

Physiological outcomes are categorised according to the underlying cause or affected body system, grouped using the MedDRA System Organ Classes (SOCs). Genetics is the scientific study of genes and heredity—of how certain qualities or

traits are passed from parents to offspring as a result of changes in DNA sequence. Some plant scientists study the breeding, physiology, and management of crops and use genetic engineering to develop crops that are resistant to pests and to drought. They also develop new technologies to control or eliminate pests and prevent their spread in ways appropriate to the specific environment.

The Ecology, Evolution and Environmental Biology program (formerly Ecology) introduces students to the study of the interactions of organisms with their environment, diversity of organisms both extant and extinct, adaptations, and mechanisms behind evolutionary change.

Immunology is widely used in numerous disciplines, including medicine, in the fields of organ transplantation, bacteriology, oncology, virology, parasitology, rheumatic diseases, psychiatric disorders, and dermatology.

Students will gain knowledge about the different cell organelles of microorganisms and their detailed functions. 2. Students will also study the growth and control of microbes as well as different bacteriological techniques involved in microbiology.

Some outcomes of the nutrition care plan to consider are direct nutrition outcomes, which are the results of the intervention created by the registered dietitian on the patient's nutritional status, clinical and health status outcomes, which are changes created by the nutrition intervention on the patient's overall

Blood Pressure: Elevated resting blood pressure is a major risk factor for cardiovascular disease and a significant contributor to stroke. Therefore, the ability to accurately assess resting blood pressure is important to health-related research.

	<p>Students will learn the structure and properties of carbohydrates, proteins, lipids, cholesterol, DNA, RNA, glycolproteins, glycolipids and their importance in biological systems. Students will develop perception on the sequencing of proteins and nucleic acids.</p> <p>Students will acquire an insight into various biomolecules which constitute the living organisms</p>

MODEL QUESTION PAPER

Dr. V. S. Krishna Govt. Degree & P.G. College (A)  
Visakhapatnam - 530013

70. In the trophic, the function of Bowman's capsule is \_\_\_\_\_  
(a) Filter (b) Peritubular (c) From kidney (d) Edward Bachner  
(a) Filter (b) Peritubular (c) From kidney (d) Edward Bachner

71. For density gradient centrifugation, one of these sugars is used \_\_\_\_\_  
(a) Glucose (b) Sucrose (c) Fructose (d) Galactose  
(a) Glucose (b) Sucrose (c) Fructose (d) Galactose

72. Cardiolipin is an example of \_\_\_\_\_  
(a) Extensive antigen (b) Intrinsic antigen (c) Transmembrane antigen (d) Extrinsic antigen  
(a) Extensive antigen (b) Intrinsic antigen (c) Transmembrane antigen (d) Extrinsic antigen

73. One of the following is a sulphur containing amino acid \_\_\_\_\_  
(a) Methionine (b) Aspartate (c) Lysine (d) Alanine  
(a) Methionine (b) Aspartate (c) Lysine (d) Alanine

74. An example of trace element in human nutrition is \_\_\_\_\_  
(a) Sodium (b) Potassium (c) Calcium (d) Zinc  
(a) Sodium (b) Potassium (c) Calcium (d) Zinc

75. The reason for using the bottom of newly constructed fish pond is \_\_\_\_\_  
(a) To control virus (b) To remove dissolved oxygen (c) To control bacteria (d) To control and scale  
(a) To control virus (b) To remove dissolved oxygen (c) To control bacteria (d) To control and scale

76. Adhesion is an adhesion disease associated with metabolism of the following amino acid \_\_\_\_\_  
(a) Tyrosine (b) Glycine (c) Lysine (d) Glutamic acid  
(a) Tyrosine (b) Glycine (c) Lysine (d) Glutamic acid

77. One of the following is not a catecholamine \_\_\_\_\_  
(a) Acetylcholine (b) Epinephrine (c) Norepinephrine (d) Adrenaline  
(a) Acetylcholine (b) Epinephrine (c) Norepinephrine (d) Adrenaline

78. Double stranded DNA with 100 to 25000 bp are best resolved with \_\_\_\_\_  
(a) Paper electrophoresis (b) Agarose gel electrophoresis (c) Polyacrylamide electrophoresis (d) Sodium dodecyl sulphate electrophoresis  
(a) Paper electrophoresis (b) Agarose gel electrophoresis (c) Polyacrylamide electrophoresis (d) Sodium dodecyl sulphate electrophoresis

79. Recombinant vaccine is used for \_\_\_\_\_  
(a) HIV (b) Rabies (c) Polio (d) Measles  
(a) HIV (b) Rabies (c) Polio (d) Measles

<b>Date of Event Organized</b>	24/03/2022 to 7/4/2022
<b>Name of the coordinator of the Event</b>	Dr. CH. Lalitha
<b>No. of Participant (Student+ Staff)</b>	20+5 (25)
<b>Name of the Expert with designation Contact number &amp; Address of the Expert</b>	<ul style="list-style-type: none"><li>• Dr. Y Shanthi prabha Lecturer in Zoology 9441269003; Dr.V S K GDC(A), VSP</li><li>• Dr.CH.Lalitha HOD of Microbiology 9491331865; Dr.V S K GDC(A), VSP</li><li>• Dr. K. Prakash Narayana Reddy Lecturer in Microbiology 9482357349; Dr.V S K GDC(A), VSP</li><li>• D Roopa devi Lecturer in Microbiology 8341649453; Dr.V S K GDC(A), VSP</li><li>• N Yerusha Lecturer in Biochemistry 9121601346; Dr.V S K GDC(A), VSP</li></ul>

**Objective of the Event**

The main objective of the programme is to induce professionalism in high end areas of biotechnology for activating productive research in Molecular biology, recombinant DNA technology, genomics and proteomics at industrial scale.

Provide modern diagnostic system and product testing techniques for improved healthcare delivery and industrial production of goods & services. Facilitate collaboration and participation with relevant scientists from across the world.

Students will understand the structures and purposes of basic components of prokaryotic and eukaryotic cells, especially macromolecules, membranes, and organelles. Students will understand how these cellular components are used to generate and utilize energy in cells.

Animal Science is an applied biology aimed at solving man's nutritional deficiencies by making livestock and its products available in man's daily menu.

Fundamentals of Anatomy & Physiology gives students in-depth instruction in the organization, structures, and functions of the human body. Students will learn the terminology, anatomy and physiology, and pathology of each body system and how they interrelate to maintain homeostasis.

Genetics. Objectives. • *To understand how nucleic acids transport genetic information.* • To understand experiments that showed the role of nucleic acids for.

Formulate original questions about plants into empirically testable hypotheses, collect and analyze data obtained from original research, and translate and apply experimental data to advance the field and solve real-world problems. Synthesize and apply knowledge to better understand and manage plant-based systems.

The structural adaptations and functional adjustment of organisms to their physical environment. The behavior of organism under natural conditions (ethology). The

	<p>evolutionary development of all these inter-relations (evolutionary ecology).</p> <p>Immunology is a diverse and growing discipline that can be defined as the study of the tissues, cells and molecules involved in host defence mechanisms. Immunologists attempt to understand how the immune system develops, how the body defends itself against disease, and what happens when it all goes wrong.</p> <p>Microbiologists are involved in addressing challenges that vary from urgent problems demanding immediate solutions, such as new and emerging diseases, through to long-term issues, like antimicrobial drug resistance, food security and environmental sustainability.</p> <p>They are to promote health and reduce the risk of developing chronic diseases by encouraging Americans to consume healthful diets and to achieve and maintain healthy body weights. Nutrition criteria are reflective of a solid scientific foundation for health and weight management.</p> <p>Metabolism consists of a series of reactions that occur within cells of living organisms to sustain life. The process of metabolism involves many interconnected cellular pathways to ultimately provide cells with the energy required to carry out their function.</p> <p>Technique allows accomplishment of the objective in a variety of ways. Technique is flexible. Technique, purely physical, purely mental, and/or using tools, allows you to perform some task or other. You can know what to do, but not have the tools.</p> <p>Define the basic structure of biomolecules, such as: amino acids and proteins, carbohydrates, fatty acids, triacylglycerol, phospholipids, steroids and nucleic acids. 2: Define the meaning and significance of essential and non-essential amino acids. 3: Understand the function of enzymes.</p>
Description of the event	<p>Genetic engineering is a field of molecular biology that involves manipulating the structure of genetic material, i.e.,</p>

deoxyribonucleic acid. Recombinant DNA (rDNA), is a strand of DNA that has been manipulated by scientists.

Biotechnology is technology that utilizes biological systems, living organisms or parts of this to develop or create different products. Brewing and baking bread are examples of processes that fall within the concept of biotechnology (use of yeast (= living organism) to produce the desired product).

Cell biology is the study of cell structure and function, and it revolves around the concept that the cell is the fundamental unit of life. Focusing on the cell permits a detailed understanding of the tissues and organisms that cells compose.

Animal science is the biological science and management of domestic livestock, including beef cattle, horses, sheep, swine and companion animals. Students learn the science, art and practical methods of caring for, improving and managing livestock and companion animals.

Physiology is the science of life. It is the branch of biology that aims to understand the mechanisms of living things, from the basis of cell function at the ionic and molecular level to the integrated behaviour of the whole body and the influence of the external environment.

Genetics is the scientific study of genes and heredity—of how certain qualities or traits are passed from parents to offspring as a result of changes in DNA sequence. A gene is a segment of DNA that contains instructions for building one or more molecules that help the body work.

Plant Sciences is the study of plant growth, reproduction, evolution, and adaptation, as well as the use of plants for food, fiber, and ornamental purposes.

The field of ecology explores the interactive web of organisms and the environment. Studies in evolution consider the processes by which modern organisms have developed from ancestral ones.

Immunology is the study of the immune system and is a very important branch of the medical and biological sciences. The immune system protects us from infection through various lines of defence. If the immune system is not functioning as it should, it can result in disease, such as autoimmunity, allergy and cancer.

Microbiology is the study of the biology of microscopic organisms - viruses, bacteria, algae, fungi, slime molds, and protozoa. The methods used to study and manipulate these minute and mostly unicellular organisms differ from those used in most other biological investigations.

Nutrition is about eating a healthy and balanced diet. Food and drink provide the energy and nutrients you need to be healthy.

Metabolism (pronounced: meh-TAB-uh-liz-um) is the chemical reactions in the body's cells that change food into energy. Our bodies need this energy to do everything from moving to thinking to growing. Specific proteins in the body control the chemical reactions of metabolism.

A biomolecule is a chemical compound found in living organisms. These include chemicals that are composed of mainly

	<p>carbon, hydrogen, oxygen, nitrogen, sulfur and phosphorus. Biomolecules are the building blocks of life and perform important functions in living organisms.</p>
<p><b>Outcome of the Event</b></p>	<p>For example, genetic engineering may involve adding a gene from one species to an organism from a different species to produce a desired trait. Used in research and industry, genetic engineering has been applied to the production of cancer therapies, brewing yeasts, genetically modified plants and livestock, and more. Tap water is usually tested for chlorine levels, pH in water and bacteria. It is advisable to test well water supplies annually even if they are not suspected in any contaminations. There are some types of water issues that can't be detected without testing.</p> <p>To provide education that leads to comprehensive understanding of the principles and practices of biotechnology. Information and Computer Literacy: To educate and make them up to date with the current scientific literature, computer programs and web information.</p> <p>Describe the evolution, diversity and replication of cells; Explain the role of compartmentalization and signaling in cellular biology; Interpret and explain key experiments in the history of cell biology; Evaluate and apply knowledge of modern techniques in cellular biology.</p> <p>Animal science—the study of the biological function of domestic and captive animals and their utilization by people—focuses on modern, efficient and humane ways to care for and make the best use of the animals who share our lives.</p> <p>Physiological outcomes are categorised according to the underlying cause or affected body system, grouped using the MedDRA System Organ Classes (SOCs). Genetics is the scientific study of genes</p>

and heredity—of how certain qualities or traits are passed from parents to offspring as a result of changes in DNA sequence.

Some plant scientists study the breeding, physiology, and management of crops and use genetic engineering to develop crops that are resistant to pests and to drought. They also develop new technologies to control or eliminate pests and prevent their spread in ways appropriate to the specific environment.

The Ecology, Evolution and Environmental Biology program (formerly Ecology) introduces students to the study of the interactions of organisms with their environment, diversity of organisms both extant and extinct, adaptations, and mechanisms behind evolutionary change.

Immunology is widely used in numerous disciplines, including medicine, in the fields of organ transplantation, bacteriology, oncology, virology, parasitology, rheumatic diseases, psychiatric disorders, and dermatology.

Students will gain knowledge about the different cell organelles of microorganisms and their detailed functions. 2. Students will also study the growth and control of microbes as well as different bacteriological techniques involved in microbiology.

Some outcomes of the nutrition care plan to consider are direct nutrition outcomes, which are the results of the intervention created by the registered dietitian on the patient's nutritional status, clinical and health status outcomes, which are changes created by the nutrition intervention on the patient's overall

**Blood Pressure:** Elevated resting blood pressure is a major risk factor for cardiovascular disease and a significant contributor to stroke. Therefore, the ability to accurately assess resting blood pressure is important to health-related

	<p>research.</p> <p>Students will learn the structure and properties of carbohydrates, proteins, lipids, cholesterol, DNA, RNA, glycolproteins, glycolipids and their importance in biological systems. Students will develop perception on the sequencing of proteins and nucleic acids.</p> <p>Students will acquire an insight into various biomolecules which constitute the living organisms</p>

MODEL QUESTION PAPER

10. In the system, the functional (secretory) capsule is \_\_\_\_\_  
(a) Bacteroid (b) Proteobacter  
(c) Firmicutes (d) Bacteroidetes

11. For density gradient centrifugation, one of these reagents is used \_\_\_\_\_  
(a) Chloroform (b) Sucrose  
(c) Potassium acetate (d) Glycerol

12. Cardiolipin is an example of \_\_\_\_\_  
(a) Lipid (b) Protein  
(c) Carbohydrate (d) Nucleic acid

13. One of the following is a sulphur containing amino acid \_\_\_\_\_  
(a) Methionine (b) Aspartate  
(c) Lysine (d) Alanine

14. An example of trace element in human nutrition is \_\_\_\_\_  
(a) Sodium (b) Potassium  
(c) Calcium (d) Zinc

15. The reason for using the bottom of newly constructed fish pond is \_\_\_\_\_  
(a) To control water (b) To increase dissolved oxygen  
(c) To control bacteria (d) To control acids

16. Adenosine is an adenine derivative associated with metabolism of the following amino acid \_\_\_\_\_  
(a) Tyrosine (b) Glycine  
(c) Lysine (d) Glutamic acid

17. One of the following is not a catecholamine \_\_\_\_\_  
(a) Acetylcholine (b) Epinephrine  
(c) Norepinephrine (d) Adrenaline

18. Double stranded DNA with 100 to 25000 bp are best resolved with \_\_\_\_\_  
(a) Paper electrophoresis (b) Starch electrophoresis  
(c) Poly acrylamide electrophoresis (d) Agarose gel electrophoresis

19. Recombinant vaccine is used for \_\_\_\_\_  
(a) Hepatitis (b) Rabies  
(c) Polio (d) Foot and mouth disease

### Event Photo Gallery

**APPGCET – 2022**  
**Post Graduation Admissions**  
**( Conducting by Yogi Vemana University, Kadapa and APSCH E )**

**APSCHE**

Hall Ticket No	30120220827	Rank	979
Candidate Name	TUNGANA GEETHIKA	Father's Name	tungana venkata rao
Gender	Female (F)	Caste/Region	SC/AU

**PROVISIONAL ALLOTMENT ORDER( For APPGCET-2022 CANDIDATES )**

This is to inform that the options exercised by the candidate have been processed based on merit, rank, local area, gender, category, Special Reservation Category (CAP/PH/NCC/SPORTS) etc and the candidate has been allotted a seat in

Acharya Nagarjuna University College, (ANUCSF), Guntur  
in M.Sc. Biotechnology, (PG066) under SC\_GEN\_AU category.

Tuition Fee fixed for the college/course is Rs. 57390/-.

Tuition fee to be paid by the candidate at the time of admission is Rs. 57390/-.

**Instructions to Candidates :**

1. The candidate is instructed to report by clicking on Allotment letter and Self-Reporting under Forms tab from website <https://sche.ap.gov.in>.
2. Take print out of two copies of joining report and report to the allotted college with all original certificates. Submit a copy of joining report and obtain acknowledgment on 2nd copy from the College where you have reported and retain the same with you.
3. Both Self reporting and reporting at the allotted college is compulsory to retain the present allotment. The last date for Self reporting and reporting at the allotted College is 19.11.2022. Pay all necessary fees if any to the allotted college.
4. If you do not report through Self-reporting system and/or not reporting at the allotted college, the provisional allotment will be cancelled and you have no claim on the seat allotted.
5. The academic credentials verified if found false at a later date, your allotment will be cancelled and you are also liable for criminal prosecution.
6. All the Principals are requested to verify the original certificates viz caste, study, income and Degree/Equivalent certificates of the admitted candidates thoroughly and request to bring to the notice of the Convenor, APPGCET-2022 Admissions for any deviation.
7. The candidate is informed that the class work shall be commenced from 18.11.2022 and directed to attend the class work.

**CONVENOR**

**Post Graduation Admissions**  
**( Conducting by Yogi Vemana University, Kadapa and APSCH )**

2022

Hall Ticket No	30120220985	Rank	416
Candidate Name	ANAKAPALLI SAI KUMAR	Father's Name	ANAKAPALLI mohan rao
Gender	Male (M)	Caste/Region	BC B/AU

**PROVISIONAL ALLOTMENT ORDER (For APPGCET-2022 CANDIDATES)**

This is to inform that the options exercised by the candidate have been processed based on merit, rank, local area, gender, category, Special Reservation Category (CAP/PH/NCC/SPORTS) etc and the candidate has been allotted a seat in

**A.U.College of Science & Technology, (AUCS), Visakhapatnam**

**in M.Sc. Marine Biology and Fisheries, (PG067) under OC\_GEN\_AU Category category.**

**Tuition Fee fixed for the college/course is Rs. 24200/-.**

**Tuition fee to be paid by the candidate at the time of admission is Rs. 0/-.**

\*\*\*Tuition fee exempted under fee reimbursement category.

Tuition fee exempted under fee reimbursement category the students belonging to SC/ST/BC/EBC/Disabled/Minority categories will be considered for Full Reimbursement of Tuition Fee under Jagananna Vidya Deevana (RTF) scheme subject to verification and eligibility criteria prescribed by State Government of Andhra Pradesh vide G.O.M.S.NO:66 dated 08/09/2010 of Social Welfare (SW,EDN.2) Dept., G.O.M.S.NO:115 dated 13/11/2019 of Social Welfare (EDN) Dept., G.O.M.S.NO:72 dated 18/02/2014 of social welfare(SW,EDN.2) department, G.O.Ms.No.77 Social Welfare dept., dated 25.12.2020 and relevant instructions issued by Social Welfare and Higher Education Dept., Govt. of A.P. from time to time. In the event of the candidate found not eligible for fee reimbursement at a later date, the candidate shall have to pay the total fee as prescribed by the Competent authority.

You are eligible for tuition fee reimbursement under the Jagananna Vidya Deevana Scheme. The tuition fee will be paid to your mother's bank account in four quarters. Hence, you are requested to pay the tuition fee amount within one week to the college from the date of receiving the tuition fee amount from the Government.

**Instructions to Candidates :**

1. The candidate is instructed to report by clicking on Allotment letter and Self-Reporting under Forms tab from website <https://sche.ap.gov.in>.
2. Take print out of two copies of joining report and report to the allotted college with all original certificates. Submit a copy of joining report and obtain acknowledgment on 2nd copy from the College where you have reported and retain the same with you.
3. Both Self reporting and reporting at the allotted college is compulsory to retain the present allotment. The last date for Self reporting and reporting at the allotted College is 16.12.2022. Pay all necessary fees if any to the allotted college.
4. If you do not report through Self-reporting system and/or not reporting at the allotted college, the provisional allotment will be cancelled and you have no claim on the seat allotted.
5. The academic credentials verified if found false at a later date, your allotment will be cancelled and you are also liable for criminal prosecution.
6. All the Principals are requested to verify the original certificates viz caste, study, income and Degree/Equivalent certificates of the admitted candidates thoroughly and request to bring to the notice of the Convenor, APPGCET-2022 Admissions for any deviation.
7. The candidate is informed that the class work is already commenced from 18.11.2022 and directed to attend the class work.

**CONVENOR**

Telephone: 04734 230448 email: info@ftseminary.com web: www.ftseminary.com

June 08, 2023

To: Mahjeddi Victor Joel

Sub: Admission Letter: B.D (Direct)

Dear Brother,

Greeting in the name of our Lord and Saviour Jesus Christ.

I am pleased to inform you that you are granted admission to the BD programme. The physical opening of the seminary is on June 14, 2023. The first installment of your fees is Rs. 16,000/-. Please bring your Original Certificates, Transfer Certificate and the Migration Certificate to the Seminary as soon as possible.

Looking forward to a meaningful fellowship in the coming academic year 2023-24.

The harvest is plentiful but the laborers are few so continue to pray to the Lord of harvest to send labourers who will work with the mind of Christ.

Yours in His service

Dr. Annie George  
Principal

NB: I. When you come to the campus, you must strictly follow the guidelines issued by state and district authorities to prevent the spread of COVID -19.

II. You are requested to bring the things necessary for the comfortable stay.

**MICROBIOLOGY Department/Committee**

**Minutes of the meeting**

MICROBIOLOGY department meeting was organized on 22/01/2023 at 12:30 PM under the chairpersonship of Dr. I. VIJAYA BABU to discuss the following agenda.

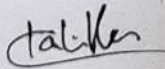

**Agenda:**

1. To organize a career guidance guest lecture by a Microbiologist
2. To organize a career guidance guest lecture by an Immunologists
3. To organize a career guidance guest lecture by Water quality laboratory technician

After a brief discussion on the agenda the following resolutions have been passed by the committee.

1. To seek permission from the Principal to organize Guest lecture on Career guidance on 28/01/2023 at 2:30 PM.
2. To prepare a circular and circulate it among all the classes.
3. To invite /Dr. CH. Shanthi Devi, as chief guest. Dr. CH. Lalitha & Dr. K. Prakash Narayana Reddy as speakers.

<b>Objective of the Event</b>	To Arrange a guest lecture on the career path of a Microbiologist. To Host a guest speaker session focusing on careers in Immunology. To Coordinate a guest lecture highlighting opportunities in the field of Water Quality Laboratory Technology.

**Description of the event**

The Department of Microbiology at Dr. V.S. Krishna Government Degree College (Autonomous), Visakhapatnam, organized a highly informative and enlightening career guidance lecture aimed at providing students with valuable insights into various career prospects within the field of microbiology and related disciplines. The event featured distinguished speakers who shared their extensive knowledge and experience with our students.

Dr. Ch. Shanthi Devi, commenced the session with an engaging discussion on the multitude of career opportunities available to Microbiologists. She emphasized the pivotal role microbiology plays in industries ranging from pharmaceuticals to food processing and highlighted the importance of microbiologists in fields such as clinical diagnostics and research. Dr. Shanthi Devi's presentation underscored the dynamic and ever-evolving nature of microbiology careers, encouraging students to explore the boundless possibilities within this field.

Later, Dr. Ch. Lalitha, delved into the promising careers in Immunology. She shed light on the pivotal role of immunologists in studying the immune system and their contribution to the development of vaccines, therapeutics, and advancements in healthcare. Dr. Lalitha emphasized the growing demand for experts in immunology, particularly in the context of emerging diseases and public health. Her presentation left students inspired to consider immunology as a vibrant and impactful career choice.

The final speaker of the event, Dr. K. Prakash Narayana Reddy, a Water Quality Laboratory Technician, provided valuable insights into the often-overlooked career path of water quality management. Dr. Reddy discussed the critical

role these technicians play in maintaining the safety and purity of our water supply, thus safeguarding public health. He detailed the skills and knowledge required to excel in this profession and showcased the significance of water quality laboratory technicians in ensuring access to clean and safe drinking water for communities.

In addition to these enlightening talks, the event allowed students to interact with the speakers, ask questions, and gain a deeper understanding of the day-to-day activities and challenges in each of these career paths.

**Outcome of the Event**

This program provided a valuable platform for students to explore their career options, gain valuable insights from experts, and make informed decisions about their future endeavors.

It was a step towards empowering students with the knowledge needed to pursue successful and fulfilling careers in microbiology, immunology, and water quality management.
