## **EVENT ORGANIZED REPORT** **(2019-20120)**

<b>Name of Departments</b>	MICROBIOLOGY AND BIOCHEMISTRY
<b>Name of Event Organized</b>	VIGILANCE AWARENESS WEEK
<b>Title of the Event</b>	INTERCOLLEGIATE ELOCUTION AND ESSAY WRITING COMPITATION
<b>Date of Event Organized</b>	05-01-2019
<b>Name of the coordinator of the Event</b>	
<b>Class of the Participant</b>	II MB BT C,III MB BC C
<b>No. of Participant (Student +Staff)</b>	30
<b>Objective of the Event</b>	self-awareness is a reflective state with attention focused on ourselves for social evaluation. This awareness leads us to judge our own behavior against our personal standards, as we use social evaluation to achieve correctness and consistency in our beliefs and actions.
<b>Description of the event</b>	Awareness is a relative concept. It may refer to an internal state, such as a visceral feeling, or on external events by way of sensory perception. It is analogous to sensing something, a process distinguished from observing and perceiving (which involves a basic process of acquainting with the items we perceive). Awareness can be described as something that occurs when the brain is activated in certain ways, such as when

	<p>the color red is seen once the retina is stimulated by light waves. This conceptualization is posited due to the difficulty in developing an analytic definition of awareness or sensory awareness.</p>
<b>Outcome of the Event</b>	<p>Studies have shown having peripheral awareness enhances overall cognition. By improving peripheral awareness, overall quality of life and productivity will consequently be improved.</p>

### **EVENT ORGANIZED REPORT**

<b>Name of Departments</b>	MICROBIOLOGY AND BIOCHEMISTRY
<b>Name of Event Organized</b>	DEPARTMENT OF MICROBIOLOGY
<b>Title of the Event</b>	SCIENCE DAY CELEBRATIONS
<b>Date of Event Organized</b>	28/02/2019
<b>Name of the coordinator of the Event</b>	
<b>Class of the Participant</b>	II MB BT C
<b>No. of Participant (Student +Staff)</b>	2
<b>Objective of the Event</b>	The day aims to promote scientific temper, inspire youth towards careers in science, and celebrate India's rich scientific heritage. National Science Day is celebrated across India on February 28 to honor the discovery of the Raman Effect by physicist Sir CV Raman in 1928.
<b>Description of the event</b>	National Science Day is celebrated every year on 28 February to mark the discovery of the 'Raman Effect' by Sir C.V. Raman on 28 February 1928. It was this discovery that got Sir C.V. Raman a Nobel Prize in Physics in 1930.

<b>Outcome of the Event</b>	National Science Day is a moment to reflect on the past achievements, celebrate the present advancements, and inspire the future generations to continue exploring the wonders of science.
