Date:

District: Visakhapatnam

Nam of the area: Madohurwada

Name of the Nurseay

Visited for Project :

Chandana Mohana Rao Nursey and Garden

### Types of Plants

Flowering Plants:

There are many types of and routine blowers plants like seasonal flowers which are very attractive by its different colones and shapes and small.

1. Seasonal Howers:-

Mainly these Howers are so attractive.

These are grown in Rainy season and thay start blowering in the winter Season.

Mainly - Marrigold, Chrysanthemum, Dhalia, Asterete.

Routine Howers:-

These Howers are available throughout the year. These are Cary to grow they can sustant all climbes and gives blowering. Mainly they blower are used as decorative blower Ex:- Roses, hibisan, Daisy, deander etc.

### Avenue Plants

In landscaping an Avenue is traditionally a straight Path or road with a line of itrees or large shrubs running along each side which is used. These Avenue trees are planted on the sides of the roads and they will decrease the Pollution and they look so attractive with a nice designing and beauty of the trees.

### Techniques of plant propogation

Raising of Seeding:

Through seedlings many of the blowering plants and timber yeilding plants are raised.

Flowering · Planty esc:-

Marrigold, Petunia, Sunblower. 2i una, Balson etc.

Propogation of plants are also clone by the process of layering and cutting many of the truit plants are propogated through Air layering Method. Some of the plants like hibiscur, Tasmine, Roses are propogeted through the stem cuttings.

Propogation through bulbs:-

Many A the Mount I flowers
one raised through buts These bulbs act as
Vegetative Propogatory ornamental blowers are
used in Merering A Boquets and deciration
in Marriages.

Some examples:-

Glosinia, Tulip, Canno, tigue lity & ladiology July etc.

### Types of soil mixture

Soil mixture plays a rejor Role in the growing of plants in the nursury.

Normally dibbeaut types of Soils. Scaoplytic plants may grown in only in Sandy Soils. other blowering plants will grow only in day soils.

The Polting mise for plants in nursury is

MU %. Garden soil

20%. Compust

20%. Cocoreat

20%. River Sand

# BOTANY

# PROJECT

WORK

This project work is mainly based on the visitence at the nursery places for the better understanding and studying and about floriculture & Nursery planing and types of Nurservice.

Nursey and floricultures are plays -a major orde in the maintance and propagation and Consening the plants in a Humans observation and proactices.

Fibriculture: - Fibriculture, of flowering farming, is a discipline of horticulture Concessed with the cultivation of flowering and stramental plants & gardens and for floristry. Compairing the floral industry. The devoloument of new Varieties is a major occupation of floriculturists.

Mursey: A nursey is a flace where plants are frogaled and grown to a desired age.

Flowering of dinamental and gardening flowers.

- -> Types of Crops include in are:
  - 1. bedding plants.
  - 2. House plants.
  - 3. Cut flowers.
  - 4. pot plants.

### -> Bedding plants:

In floriculture, it suferes to the temporary planting of fact growing plants into flower beds to Create Coloverful, temporary, Leasonal displays. during spring, summer of winter.

House plants: That grown in indoors in a place such as a sceridences and offices. Namely for december plants.

1. Variegaled : Cutivales of Santenieria trifastiala Namely (Low rentii) a Common house plant.

Saintfaulia is a commonly weed as a · decorative plant.

Thoweving plants 1-

Plants like . Leasonal . flowers and noutine flowers.
which are very attractive by it different. Colows

#### Seasonal flowers:

Mainly there flowers are to alternative There are grown in lainly thereon and they start-flowering in the winter reason.

Mainly: Marigold: Wreparthanun alalia. Astu. Etc.,

•Container used for nursery raising must have good drainage and be able to hold see less media and ease in handling. Table: recommended size of cell in plastic trays

Crop	Cell size (inches)	Optimum size for early production	
Tomato, brinjal	1.5-4	3.0	
capsicum	1.0-4	2.0	
hilli	1.0-3	2.0	
cucumber	1.5-4	2.0	
Cole crops	13	2-3.0	
•			

### Optimum temperature ranges for germination of seeds

Crops	Germination (° C)	Appr. Days to emergence	Growing temp. during day (° C)	Growing temp. during night (° C)
Tomato, brinjal	21-24	3-4	18-21	12-18
Capsicum &chilli	26-28	4-6	18-21	12-18
Cale crops	18-24	2-3	10-18	8-14
Cucurbits	24-30	2-3	21-24	12-18
Onion	18-24	3-4	16-18	8-15

For healthy seedlings growth one seed per cell is sufficient, however, if some more seeds are sown then one seedling may be retained per cell after thinning and the thinned seedlings can be gap filled in where there is no seed germination

#### Cutting plant:

are also maintained and Enposed.

There plants are earn gorown up. Industrated and afrown uped, they have to be cultivated and maintained daily for their growth.

Different types of instruments are used for the bed - preparation

- many of the ingernments are used for this like, spades, consort, sprinklers, gams.
- The plant publish it trept in is a plastic marlow, and prous natured poughere blank borg

plant both indoor outdor and snemental plants and therein preparational types.

#### Indoo plans:

Then are many different types of Indoor plants which are different shopes and some are alternative many then budoor plants in the nursery are grown in shade nets.

and it is Hydrophytic plant.

The flowering orange may be very len and annual plants and they continues.

The plants and they continues.

bragon plant

These are some fruit plants which are grown in some dry lands where there is an less water availability this fruit plant peropagated by Stem Cuttings.

OREK IN BOTANY

VS Krishna Govt. Degree Colle

Visakhapatnam

Date:

Head of the Department LECTURER IN BOTANY Dr. VS Krishna Govt. Degree Colle Visakhapatnam District: Visakapatram

Name of the Area: Hadherewada

Name of the Norwery :-

Chandona Mohana Rao Nursery and Granden

とうててアイファファファファン

### Types of Plants

### FLowering Plants:

fouring plants like bearant fouries of bours by Larach Larach private by which are very attractive by its different Colors and Shapes and Smell

1 Seasonal Howers:

Mainly these flavors
one so attractive. These are grown
in Rainly season and they start
flavoring in the winter season.
Mainly- Massigold, Chrysarthumum,
Obalia, Aster etc

Routine flavous:

Thuse flowers are avoidable theregrand the year. These are Easy to grow they can bustain at all climates and gives flowering. Hairly these flowers are a used as decoration blavers

Ex- Roses, hibiscus, Daisy, dearder Ctc.

# Avenue Plants

In landscaping an Avenue dasser of the Hope of the describes of the describes of the describes and a strict of the describes and the describes and the describes and the describes the Political and the describes the Political and the describes of the describes of the describes of the describes and they will a nice designing and breatly of the trees.

Ex- Polyathia Longifolia

# Techniques of plant propogation

Raising of Scedling :-

the Howevirg Plants and timber yeilding Plants are thanks one traised

flowering plants Ex:

Marvigold, Peteria, Surflower, Zirna, Balson Etc.

39999999999999

Peroposation of Plants are also done by the process of Laywing and witting. Many of the fruit Plants are proposated through Airlayering method. Some of the Plants like hibisars, Tarmine, Roses are proposated through the Stem witings.

# Types of Soil missere

Soil mixture plays a major Role in the growing of plants in the nurbary. Notmally different types of Plants grow in different types of Soils. Suraphytic plants may grown in only in Sandy Soils. other flowering plants will grow only in Clay Soils. The potting mix for plants in nurbary is

401. Granden Boil
201. Compost
+
201. Cocapeat
+
201. River Sand.

### **ACKNOWLEDGEMENT**

Now a days peoples are developing new styles of homes ,gardens ,works and so many for all beautifications is the most important and that only through the natural for the plant nursery plays a significate role in the beauty purpose of landscaping

I am happy to do this project I know the importance and the uses of a so many plant nursery in landscaping of the gardens, houses etc....... so

I would like to express my special thanks of gratitude to my project guide **DR.K. VIJAYA LAKSHMI** madam as well has our principal **DR.I. VIJAYA BABU** sir who gave me the golden opportunity to do this wonderful project on the topic study on plantation which also help me in doing a lot of research and I came to know about so many new things I am really thankful to them.

Secondly, I would also like to thanks my parents and friends who helped me a lot in finalizing this project within the limited time frame.

I would like to express my sincere thanks to my department of botany for making me knowledge on the project report

## INTRODUCTION ABOUT NURSERY

**AIM**:- nursery, place where plants are grown for transplanting, for use as stock for budding and grafting, or for sale. Commercial nurseries produce and distribute woody and herbaceous plants, includingornamental trees, shrubs, and bulb crops.

Nurseries are two types:They

are: 1.Temporary Nursery.

2.Permanent Nursery.

#### Temporary Nursery:-

Those nurseries which are made for the time being ie for one or two years are called temporary nurseries eg Shisham nurseries at Changa Manga.

These nurseries are usually made in felling coups so that after felling, regeneration can be done easily or in those areas where afforestation work is needed.

Soil for these nurseries should be fertile because we do not give fertilizers to these nurseries.

These nurseries are raised along roadside and canal-side plantations.

Advantages of Temporary nursery:

- Temporary nurseries are at the time called flying nurseries ie these can be shifted to any site.
- Low capital cost
- · Reduced transport cost
- Within climatic site conditions
   Skilled labour is not required
- Near planting site.

#### Permanent nursery:-

Those nurseries which are not temporary but remain year after year are called permanent nurseries.

Such nurseries should be centrally located so that the distribution of plants may be easy. It should be near headquartered so that it should be protected and supervised during work. These nurseries should be manure and fertilized from time to time.

Advantages of Permanent Nursery

- It is well designed
- · It has a good water supply
- · Provide required no of plants
- · Provide the required size of plants

# Preparation of soil mixing

Potting Mix: prepare Perfect Potting Mix with 5 easy DIY steps

Potting mix or soil mix or pot mixture is a growing medium for young and potted plants. Everybody loves to have green plants and colourful flowers in and around their home. You may also have a be desire to have a lush Green Balcony. But in fact, many enthusiasts don't get the desirable growth of potted plants due to one or other reason. Among these different reasons for poor pot plants, improper making of growing media is one of the main reason.

Potting Mix is a mixture of garden soil, river sand, compost and other materials in a proper ratio to get good growth of potted plants.

It is used as a growing media by gardeners worldwide for growing pot plants and in balcony garden. Potting Mix can be made with soil or without soil as per need and availability. Moreover one can even buy this from market but why to spent scarce money if you have knowledge. As 'every mother has a secret recipe ', this is also true in case of making Potting Mix. You will become more expert in making the mixtures with your gardening experience.

#### PREPARATION OF COCOPEAT

How to Make and Use Cocopeat at Home - An Easy Step-by- Step Guide

Do you know why coconut tree is also called "Kalpavriksha" - because it's a tree that not just gives food but also firewood and shelter. Wondering how? Well, we might know it for the coconut and tender coconuts but did you know that the outside layer of husk that surrounds the shell of coconut consists of fibers which are removed from the shells to make ropes, carpets, doormats, brushes, mattresses and the powdery dust which remains after preparing the above makes for coco peat that can be used in gardening. The coconut fronds are used in thatched roofs in rural areas and have many different uses. The incredible truth is that no part of the coconut used goes to waste! Every part is beneficial to us and man has learned to put them to good use.

So coming to the topic...

#### What is Cocopeat?

Cocopeat is a byproduct that remains after the extraction of coconut fibers from the husks or shells. It is also called "coir fiber pith" or "coir dust".

Cocopeat is full of nutrients and is an excellent gro medium.

How to Make Cocopeat at Home

Cocopeat can be made easily at home and one can ensure it is clean and pure without any added adulterations. Cocopeat is biodegradable and eco-friendly and an amazing growth medium.

#### Steps to prepare:

- 1.Collect coconut husk and store them in a clean place.
- 2. After pulling out fibers, dry them. Then chop or cut them into small pieces with help of a good pair of scissors or cutters.
- 3.Grind them in a mixer grinder to a fine powder. The coco fiber will be separated as fluff.
- 4. Remove the fibers out of coco peat powder withthe help of a sieve.
- 5. Manually remove the fibers from atop the sieve.
- 6. You can use a good stainless steel soil sieve. This resultant peat should be washed with water to remove excess salts.
- Soak the peat in water for about an hour.
- 8. Squeeze out excess water with hands.
- 9.Dry it in direct sunlight for a day. Coco peat is ready to be used.
- 10. You can fill it in a planter and start planting

# **Process of plantation**

Propagation is the process of creating new plants. If you have ever planted a seed or stuck a stem in water until it forms roots that you stuck it in a pot or planted it in the garden, you have experienced propagation. Some plants are easier than others to propagate and different methods work better with different plants. The technique you select will depend on the type of plant you wish to propagate and the amount of time and effort you want to put into it.

#### I. CUTTINGS

Stem cuttings The most common propagation method for ornamentals and woody shrubs. Starts
 with about 3 " stem dipped in rooting hormone, placed in a container filled with dampened growing medium for a few weeks.

Leaf cuttings – houseplants, herbaceous plants (perennials, annuals and biennials) & woody plants – a leaf or part of it is placed in the soil with the side closest to the stem pointing down – "great forpropagating many plants from one"

- Root cuttings are usually taken from woody plants or perennials, while they are dormant, during
   November through February, when there is not as much going onin the garden. Usually done outdoors.
- With all cuttings, place them in a container with wet paper towels to keep them moist until you getto
  where you're going to plant them. Be sure to take more than you think you'll need, as probably
  manywill not root.

**LAYERING**:- effectively clones the plant. Layering is done naturally by many plants through runners, offshoots, or when a stem drops to the ground and gets covered by soil.

Here are a number of layering techniques:

ノソソソソソソソソソソソソソソソソ

- Simple layering - stem is wounded, stapled, and covered

### **BONSAI PLANTS**

Bonsai gardening originated in China more than 2,000 years ago before becoming popular in Japan. Theart form reflects contemplative ideas of nature, elements, and change, uniquely expressed on a smallscale. With regular care and attention, many prized specimens grow so old that they're handed downfrom one generation to the next.

How to Begin Bonsai Gardening....

Bonsai plants are grown and trained in shallow pots, so they often need daily watering in warm weather.

In the winter, tender bonsai need to go indoors or in a greenhouse; hardy plants can stay outdoors aslong as they're protected from drying wind and direct sun.

#### Step 1: Prep Root Ball

Remove the plant from its nursery container, and cut off the bottom two-thirds of the root ball. Rake through the soil on the surface to expose some roots. Moisten all the roots using a spray bottle.

#### Step 2: Put Root Ball in Pot

remove dead branches and branches that distract from the vision you have for your tree. Remove anydead roots and any large roots that will interfere with potting. Position the plant in the pot, and workthe soil in around the roots. Top the soil with gravel or moss, and water well.

#### Step 3: Start Shaping Tree

Decide which branches would benefit from shaping. To achieve the desired shape, wrap wire snugly butnot so tightly that it inhibits growth (this will help guide the branch to grow in the direction and shape you want). Remove the wire when the branch has grown enough to hold its new shape.

# **Bonsai Care After Planting**

Once you've planted your bonsai, you'll have to treat it a little differently than a regular houseplant.

Follow these tips to keep it in top shape.

### Watering

Type-A plant parents won't love this tip, but it's the best way to ensure your bonsai gets the right amount of water.

### **Fertilizing**

As a rule of thumb, most bonsai trees should be fertilized throughout their growing season (early springto mid-fall). **Soil** 

Most bonsai soil mixes are a combination of Akadama (hard-baked clay), pumice, lava rock, and soil.

# **Aquaponics**

Aquaponics is a food production system that couples aquaculture (raising aquatic animals such as fish, crayfish, snails or prawns in tanks) with hydroponics (cultivating plants in water) whereby the nutrient-rich aquaculture water is fed to hydroponically grown plants.

#### **Findings:**

- 1. Poverty alleviation: This is the first reason for making available micro finanancial services. Poverty alleviation can be accomplished through the promotion of sustainable livelihood, by providing easy and affordable access to credit and other complementary services required for promotion of live hoods.
- 2. Harnessing talents: Microfinance services help harness the talent leadership and entrepreneurial abilities of the poor. Microfinance services facilitative enterprise development and provide large employment generation in rural areas where poor can obtain employment.

#### **Findings:**

- 3. Women empowerment: Micro financial services mobilizing the woman, organizing them into groups, building their capacity for self management at the grass root and enabling them to access wide range of services including credit saving, insurance and business development.
- **4. Credit delivery:** Microfinance services are needed to ensure effective delivery system. The system seeks to ensure rational allocation of resources in the form of subsidized credit in rural areas.

#### **Findings:**

- **5. Social integrity** SHGs encourages collective efforts for combating practices like dowry, alcoholism etc
- 6. Gender Equity SHGs empowers women and inculcates leadership skill among them.
  Empowered women participate more actively in gram sabha and elections
- 7. Voice to marginalized section Most of the beneficiaries of government schemes have been from weaker and marginalized communities and hence their participation through SHGs ensures social justice.
- **8. Financial** Inclusion Priority Sector Lending norms and assurance of returns incentivize banks to lend to SHGs.

# Conclusion

Some valuable lessons can be drawn from the live project experience. India is to stand among the country of developed nation and there is no denying the fact that poverty alleviation and reduction of income inequalities has to be the top most priority. In this backdrop impressive gain made by SHG-Programmes in coverage of rural population with financial services offers a ray of hope. The paper argues for mainstreaming of impact assessment and incorporation of local factors in service delivery to maximize impact of SHG Programme on achievement of Millennium Development Goals (MDGs) and not letting go the opportunities

## Conclusion

Self-Help through Mutual Help" the logical concept initially developed by women. In male dominated society, women have no money or source of income for their personal expenditures or to spend on their own choices. A sincere effort has been being made by the Govt. to bring more women under SHG movement to empower them politically, socially, psychologically and economically in the state, in general, and in the district, in particular.
