## CO – PO ATTAINMENT METHODOLOGY

### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

➤ Step 4:

**Calculation of CO attainment:**

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

Calculation of PO attainment:

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

**PSO attainment:**

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

### DEPARTMENT OF SANSKRIT

### CO & PO ATTAINMENT

2018 – 2019

#### CO – PO ATTAINMENT METHODOLOGY

##### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

##### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

##### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

➤ Step 4:

#### Calculation of CO attainment:

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

#### Calculation of PO attainment:

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

#### PSO attainment:

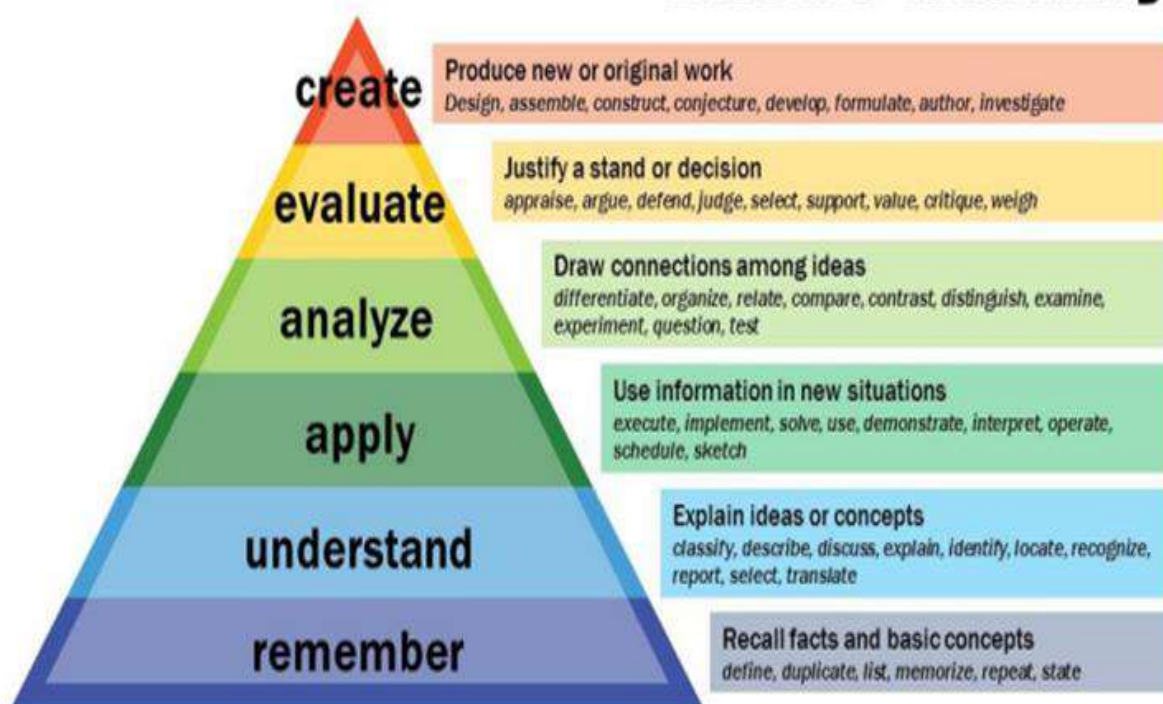

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

#### Levels of Bloom's Taxonomy

Level-1	Knowledge/Remember
Level-2	Understand
Level-3	Application
Level-4	Analyze
Level-5	Evaluation
Level-6	Create

## DEPARTMENT OF MICROBIOLOGY

### CO & PO ATTAINMENT

2018 – 2019

#### CO – PO ATTAINMENT METHODOLOGY

➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

➤ Step 2:

### **Calculation of Course outcome level index (COLLI):**

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

➤ Step 3:

### **CO-PO mapping and CO-PSO mapping**

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

➤ Step 4:

### **Calculation of CO attainment:**

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

Calculation of PO attainment:

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

### **PSO attainment:**

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## CO – PO ATTAINMENT METHODOLOGY

### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

➤ Step 4:

**Calculation of CO attainment:**

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

**Calculation of PO attainment:**

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

**PSO attainment:**

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## CO – PO ATTAINMENT METHODOLOGY

### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

### ➤ Step 4:

#### Calculation of CO attainment:

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

### ➤ Step 5:

Calculation of PO attainment:

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

#### PSO attainment:

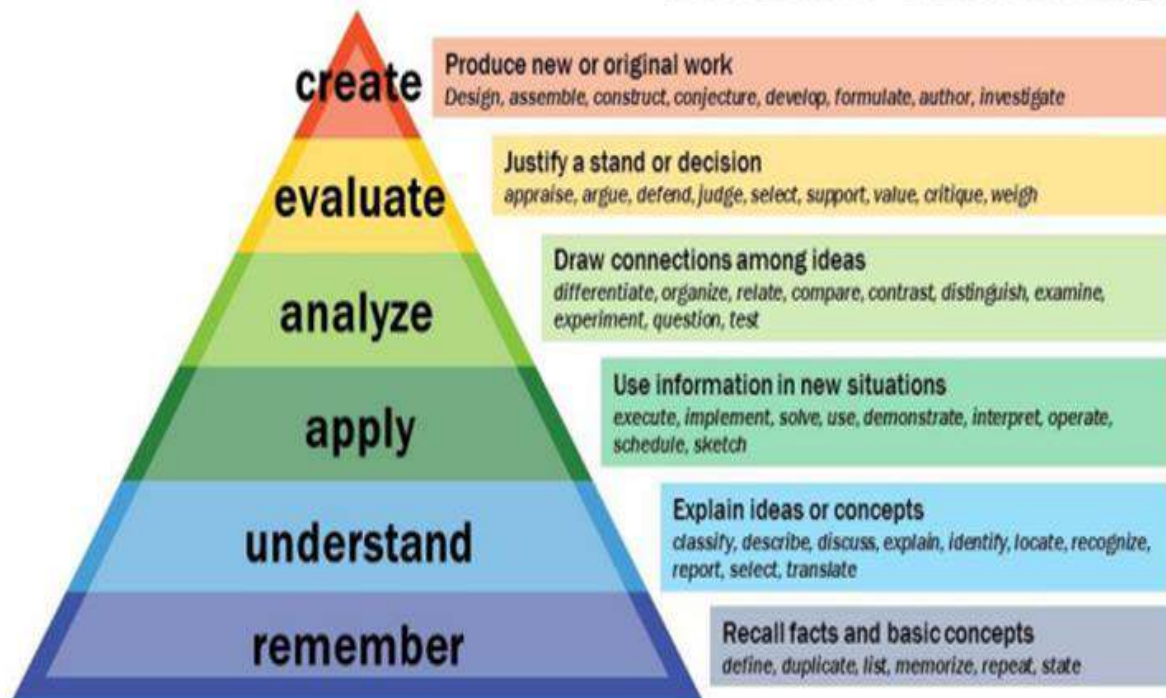

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## CO – PO ATTAINMENT METHODOLOGY

### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

➤ Step 4:

**Calculation of CO attainment:**

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

**Calculation of PO attainment:**

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

**PSO attainment:**

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## CO – PO ATTAINMENT METHODOLOGY

### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

### ➤ Step 4:

#### Calculation of CO attainment:

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

### ➤ Step 5:

Calculation of PO attainment:

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

#### PSO attainment:

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## Dr V S Krishna Government Degree College (A), Visakhapatnam

### Department of Computer Science

#### CO – PO ATTAINMENT METHODOLOGY

##### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

##### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

##### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

➤ Step 4:

**Calculation of CO attainment:**

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

**Calculation of PO attainment:**

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

**PSO attainment:**

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## DEPARTMENT OF ENGLISH CO & PO ATTAINMENT

2018 – 2019

### CO – PO ATTAINMENT METHODOLOGY

#### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

#### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

#### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

#### ➤ Step 4:

### Calculation of CO attainment:

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

Calculation of PO attainment:

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

### PSO attainment:

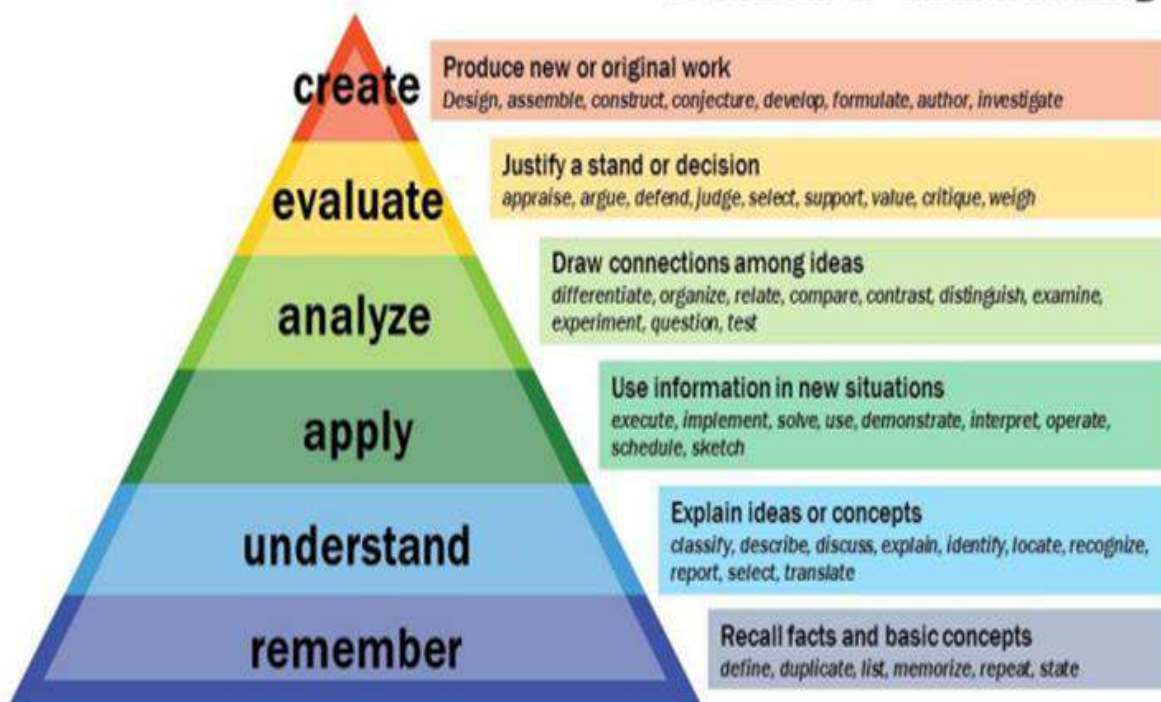

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## CO – PO ATTAINMENT METHODOLOGY

### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students was assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorized into four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as Course Outcome Weighted Average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

➤ Step 3:

**CO-PO mapping and CO-PSO mapping**

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

➤ Step 4:

**Calculation of CO attainment:**

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

**Calculation of PO attainment:**

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

**PSO attainment:**

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using the below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## CO – PO ATTAINMENT METHODOLOGY

### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

➤ Step 4:

**Calculation of CO attainment:**

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

Calculation of PO attainment:

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

**PSO attainment:**

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## CO – PO ATTAINMENT METHODOLOGY

### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

(a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%

(b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

### ➤ Step 4:

#### Calculation of CO attainment:

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

### ➤ Step 5:

Calculation of PO attainment:

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

**PSO attainment:**

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## CO – PO ATTAINMENT METHODOLOGY

### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

➤ Step 4:

**Calculation of CO attainment:**

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

Calculation of PO attainment:

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

**PSO attainment:**

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## CO – PO ATTAINMENT METHODOLOGY

### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S.No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO's. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

### ➤ Step 3:

#### CO-PO mapping and CO-PSO mapping

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

➤ Step 4:

**Calculation of CO attainment:**

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

Calculation of PO attainment:

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

**PSO attainment:**

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$

## CO – PO ATTAINMENT METHODOLOGY

### ➤ Step 1

#### Calculation of Course Outcome Weighted Average (COWA)

The performance of the students assessed by two methods

- (a) Direct Assessment: The weightage for internal exams is 30% and for semester end exams is 60%
- (b) Indirect assessment: 5% weightage for exit survey and 5% for extracurricular activities

The performance of the student is categorised in four levels

S,No	Percentage obtained by the student in DA and IDA	Level weightage
1	Less than 35%	0
2	Between 35% and 50%	1
3	Between 51% and 70%	2
4	Above 70%	3

The average level of all students for a particular course is found. It is called as course outcome weighted average (COWA).

$$\text{COWA} = \frac{\text{some of the level weightage of all students of a course}}{\text{total number of students}}$$

### ➤ Step 2:

#### Calculation of Course outcome level index (COLLI):

To Map the course outcomes (COs) of a course with Blooms levels (1 to 6) by using action verbs used in CO' s. A course outcome may be mapped to multiple Blooms levels; hence we need to calculate the average Blooms level weightage (ABLW).

$$\text{COLLI} = \frac{\text{Sum of the weightages of blooms levels mapped}}{\text{number of levels mapped}}$$

➤ Step 3:

### **CO-PO mapping and CO-PSO mapping**

Map each course outcome with POs and PSOs in levels 0,1,2,3. A CO may be mapped to multiple POs or PSOs with different levels 1,2,3. The weighted average of each PO is to be calculated.

➤ Step 4:

### **Calculation of CO attainment:**

The formula for Course Outcome Attainment (CO Attainment) can be calculated by using below formula

$$\text{CO attainment} = \text{COWA} + \left\{ (3 - \text{COWA}) \times \left( 1 - \frac{\text{COLLI}}{3.5} \right) \right\}$$

(Blooms Level Weighted Average value = 3.5)

➤ Step 5:

Calculation of PO attainment:

The formula for Programme Outcome Attainment (PO Attainment) can be calculated by using below formula

$$\text{PO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PO level mapped with CO})}{\text{Sum of the PO levels mapped with CO}}$$

### **PSO attainment:**

The formula for Programme Specific Outcome Attainment (PSO Attainment) can be calculated by using below formula

$$\text{PSO Attainment} = \frac{\Sigma(\text{CO attainment})(\text{PSO level mapped with CO})}{\text{Sum of the PSO levels mapped with CO}}$$
