

Dr. V.S.KRISHNA GOVERNMENT DEGREE COLLEGE (A)

Affiliated to Andhra University

District Resource Centre & Centre for Research Studies
Maddilapalem, VISAKHAPATNAM-530013, Andhra Pradesh

4.4.2 ADDITIONAL INFORMATION

Dr. V.S. Krishna Government Degree and PG College (A) has established comprehensive systems and procedures for maintaining and utilizing its physical and academic support facilities, ensuring they are in optimal condition to support the educational needs of students and staff. These facilities include laboratories, libraries, sports complexes, computers, and classrooms.

The college maintains specific policies for its science, computer, and language labs. Each lab is managed by a technician responsible for daily upkeep and equipment maintenance. Regular inspections ensure proper functioning of all apparatus, with prompt repairs and replacements as needed. Laboratory usage is scheduled in advance, with proper records maintained for tracking. Safety protocols are strictly enforced to prevent accidents and ensure a safe environment.

The college library, a crucial academic resource, is managed by a qualified librarian and support staff. They oversee the maintenance of books, journals, and digital resources, following a systematic cataloging and arrangement process. Regular audits check for lost or damaged books. The library offers access to e-books and online journals, providing a wide range of academic resources. A well-organized lending system allows borrowing, and the library maintains a quiet, conducive environment for study and research.

The college offers facilities for various indoor and outdoor sports, maintained by a sports committee. Regular maintenance of sports grounds, equipment, and indoor courts ensures they remain in top condition. The sports complex is available to students during designated hours, and the college organizes regular sports events and competitions. The sports committee ensures equipment safety and availability for all students.

The IT department manages the maintenance and upgrading of computer systems, critical for both academic and administrative functions. Regular updates ensure software and hardware are current, and anti-virus measures protect against cyber threats. Dedicated computer labs provide access for students, with Wi-Fi available campus-wide to support digital learning. Usage policies ensure responsible and educational use of computers.

Classrooms are given high maintenance priority, with a team regularly cleaning and inspecting them. Repairs to furniture, fixtures, or electrical systems are addressed promptly. Classrooms are equipped with essential teaching aids, such as blackboards, whiteboards, projectors, and audio systems. The college ensures

classrooms are comfortable and conducive to learning, with adequate lighting, ventilation, and seating arrangements.

An administrative team coordinates overall maintenance. Regular inspections and audits identify and address maintenance needs. A system for reporting issues ensures quick resolution by a response team. Preventive maintenance schedules minimize the risk of equipment failure and infrastructure deterioration.
